

Proactive Agricultural Safety & Support Inc

# Safe and Effective Livestock Vaccination

3 hour workshop

## What will I learn?

- Effective, easier, quicker and safer injection technique for OJD (Gudair) and other vaccines
- Needle stick injury first aid
- OJD implications for your business

## Who should I bring with me?

Anyone on your farm who has contact with vaccines and animals  
Your current vaccination equipment (guns and needles)

## What will we cover?

### **Safe and effective injection**

- Legal obligations
- Lamb marking vs weaning
- Vaccine storage and expiry
- Needle management (short vs long)
- Injection site — subcutaneous vs intramuscular
- Single handed technique
- Needle stick first aid and OHS
- Understanding a Material Safety Data Sheet (MSDS)

**Practical Training:** On a nearby farm after lectures

### **OJD — current situation and management**

Brief update on the current situation with OJD in Tasmania and the key management implications

### **OJD — carcass impacts**

**Chris Cocker** from Tas Quality Meats will show workshop participants the effects of OJD on the final carcass and will display samples of OJD infected sheep organs.
